

We build the

<trusted ecosystem>

for the laboratory
of the future.

Labforward connects teams, data,
devices and processes.

Get to know our solutions:

Labfolder: The software for
intuitive research data
management.

Laboperator: The platform
to connect devices and execute
workflows.

Always accessible and easy to use.

With **<LAB FOLDER>**
 we created an intuitive
 and intelligent software
 to manage all your data.

You don't just go paperless, with our ELN you have all the functions of an ELN and inventory management, together with team collaboration features.

All your laboratory data in one place

- > Work with text, spreadsheets, charts and images
- > Upload and store all file formats
- > Work together as a team on shared projects

Find your data in seconds

- > Link lab notes to a built-in inventory system
- > Search and filter everything your team ever recorded
- > Find experiments by material/equipment used

With **<LAB OPERATOR>**
 we took a different
 approach to lab
 automation.

We developed a vendor-agnostic technology allowing you to orchestrate the equipment you already have in your lab.

Combine your devices in intelligent workflows

- > Build your own automated workflows
- > Monitor & control lab equipment remotely
- > Combine data and calculate parameters

Monitor your laboratory equipment 24/7

- > Create dashboards to bundle equipment monitoring
- > Get notified when instrument values are out of range
- > Integrate safety protocols and reports

An evolving
<ecosystem>

Together with customers and industry partners, we strive to provide solutions that bring laboratory routines to the next level.

> SW Signature Workflows for effective document management in your lab

> WP Well plate templates to efficiently design and run multi-well experiments

> LD Lab dashboard to efficiently monitor your environment

> SL Smartlab to get your entire laboratory to the next level

And we are not done yet!

Just as the laboratory environment continuously evolves, we not only make sure to provide progressive but also reliable solutions which allow you to comply with regulations such as GxP, ISO standards FDA and HIPAA.

For our supportive spirit, we're trusted by the most innovative laboratories and solution providers worldwide.
