

Audit and Inspection Support

How to prepare and stay ready for regulatory inspections

Audits and authority inspections can have far-reaching organizational, production related and financial effects on a pharmaceutical company. In order to pass audits and inspections it is key that important measures must be taken: such as conducting trainings, preparations and continuous maintenance of readiness. The aim is to achieve a state of systems, documentation and processes that could be audited or inspected at any time.

Identifying deviations and weaknesses before an official inspection is better and easier from both a financial and a reputation point of view. Through targeted mock inspections, often also through inexpensive and relatively simple assessments, improvement measures can be defined and then implemented.

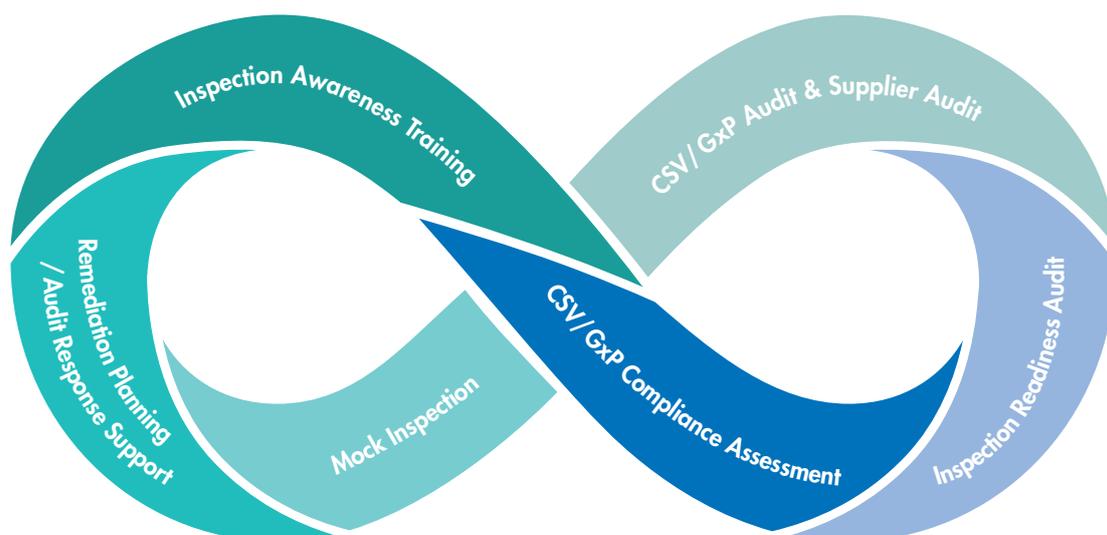

The situation of an inspection is very stressful. It is therefore important to train employees on how to behave in this kind of a situation. In addition, professional preparation gives you a safe feeling during the inspection.

We support you in many ways to prepare for regulatory inspections and audits. Our tailor-made offering will give you greater certainty to be continuously ready for an inspection at any time.

What we offer

- Company specific awareness trainings to coach employees at all levels
- Compliance assessments of computerized systems and processes
- Pre-inspection audits to assess the compliance state and readiness level
- Formal CSV/GxP audits, supplier audits, which primarily focus on the identification of weak points
- Mock inspections, in which the situation of an official inspection is simulated
- Support to plan remediation activities after inspections and to create audit responses

Audit and Inspection Support

wega is your service provider specialised in the Life Science, Pharma and Healthcare industry. Our unique combination of Business, Process and IT knowledge enables us to fulfil our demanding mission: **Building the bridge between business and IT.**

**360° Services in Life Science,
Pharma, and Healthcare IT**
