

From Raw Patient Data To Reliable Evidence

Reliable evidence is crucial for drug safety and drug development. In addition to clinical trials, Real World Data can offer valuable insights on the well-being of patients. However, data is not evidence. That is where Global Value Web comes in.

About Real World Evidence

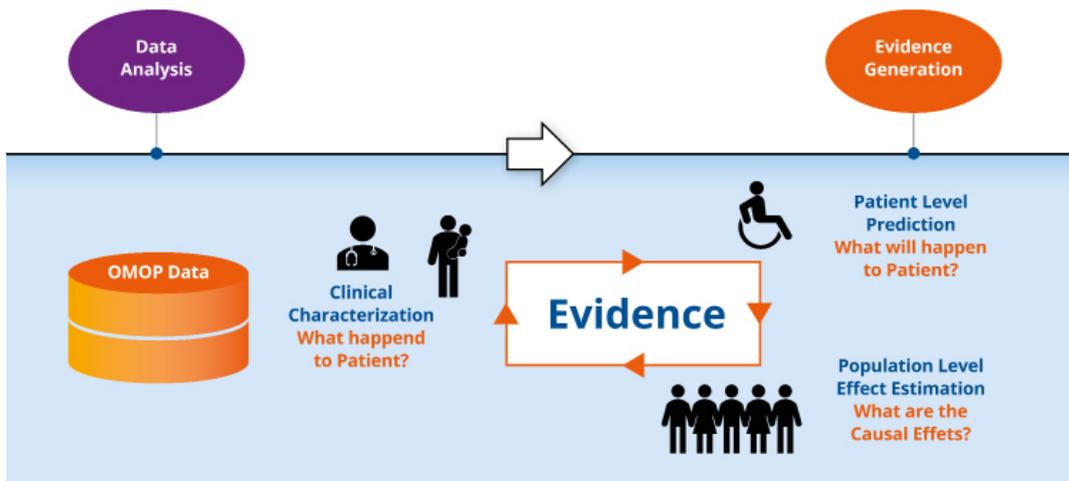

Real World Evidence (RWE) is derived from Real World Data (RWD). Data gathered from multiple sources is analyzed and used to promote high-quality, reproducible, transparent evidence generation that addresses healthcare needs. This evidence can be used across your product's life cycle. For example, in disease epidemiology, treatment effectiveness, safety, and economic value, depending on your organization's needs.

Generating The Evidence That You Need

GVW generates evidence by analyzing data gathered from routine clinical practice, providing insights into areas including disease epidemiology, treatment effectiveness and safety, and health economic value and impact.

We provide your organization with an effective, efficient, sustainable, and resilient data-driven value chain that brings the data to patients faster for evidence generation. On – demand access to this RWE will ultimately result in better drug products and improved health outcomes. RWE allows for a patient – focussed production line which will affect our approach to healthcare like never before.

Observational Health Data Sciences And Informatics (OHDSI)

When you work with Global Value Web, you benefit from the insights and knowledge gathered by OHDSI, a multi-stakeholder, interdisciplinary collaborative that provides access to over 150 databases across 21 countries with 2B+ patient records. It aims to bring out the value of health data through large-scale analytics. As a collaboration partner, we can use the vast amounts of data from the OHDSI to benefit your business.

Prepare For The Future With Help From Our Experts

Our professionals specialize in data standardization, visualization, and prediction modeling. We work for global enterprises and have all the know-how you need to make successful changes in any aspect of data handling.

Our support team is available 24/7 for our client's questions, and we are ready to help you with any data challenges you might face.

Speak with our Experts now!
