GLOBAL VALUE WEB

Lab Enabling Services

From Disparate Product Data

To Data as a Common Ground for Enterprise Unification

Our Lab Enabling Service can supercharge pharmaceutical labs. Through data organization, standardization, curation, and analysis, we ensure that you can use your Lab's Master Data quickly and efficiently. Furthermore, we facilitate effective data life cycle management, resulting in faster processes and valuable insights that enable better health outcomes.

Data: The Cornerstone Of Any Lab

Any pharmaceutical lab relies on data to operate smoothly. Detailed research on analytical data and stability data makes for quality products, while process data can provide valuable insights into efficiency, planning, and customer behavior. However, data experts are hard to find, and not every pharma lab has the time or resources to make the most of the data, internally and externally.

Connecting Dots Throughout the Value Chain

Apart from our extensive knowledge of data, we add value to our clients with a bird's-eye view. Our experts employ data in every phase of the drug life cycle: research, development, and operations.

How We Enable

Our job is to handle the data in the broadest sense. Our Lab Enabling Service is a customizable service that we adjust to your needs and desires. Some examples of what our lab enabling service can include:

Master Data Management

- Data Standardization & Harmonization
- Data Implementation
- Data Migration
- Data Configuration
- Data Maintenance

Stability Data Management

- Stability Master Data
- Spec and Protocol Creation
- Stability Study Management
- Sample Tracking and Storage
- Reports: Stability & Regulatory
- Events Management

Compliance Check & Software Integration

- Electronic Data Processes: LIMS, ELN, LES, SDMS, CDS
- Automated Lab Methods
- Streamlined Quality Reporting
- SOP Management & Standardization
- Training Administration & Management

Sample Logistics Management

- Curating & analyzing all logistics data from manufacturing to delivery to the customers
- Enhanced data reliability, accuracy, and streamlined connectivity

Don't Forget The People

We provide your people with easy ways to access and process data, allowing them to focus on their core tasks instead of sifting through numbers. Our experts will work on-site or online to provide your professionals with the required training and support to use data more efficiently.

We also like to learn from you and collaborate in facing the challenges of tomorrow.
