

From a disrupted product value chain *To establishing a digital thread*

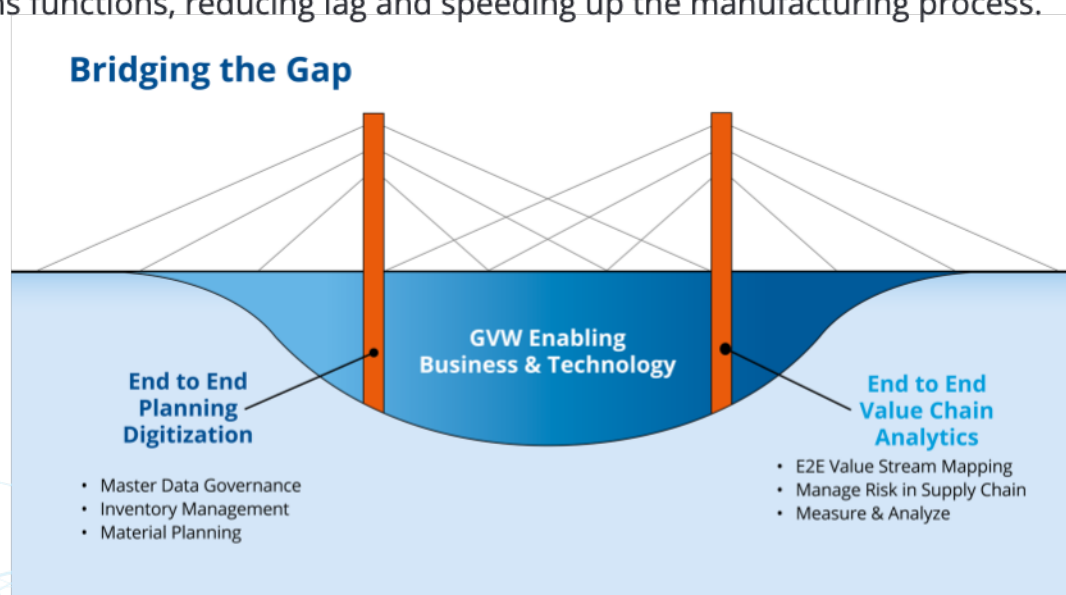

In Pharma & Life Science value chain, planning is essential. Getting products to patients in time requires a seamless process, with minimal delay in every part of the value chain. We help our clients to gather, organize, curate, and analyze data to optimize their planning.

End To End Value Chain Enabling

We drive business transformation and improve your value chain through connected data. At Global Value Web, we believe that digitization can create a smart environment and provide integration of platforms that will enable you to stay competitive.

We improve operational efficiencies by integrating data from research, development, and operations functions, reducing lag and speeding up the manufacturing process.

Planning Digitization Services

Seamless planning is a way to keep up with the market pace and unlock business value. We can help you digitize several aspects of the production, saving production times and ensuring speedy delivery. For example:

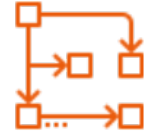

Master Data Governance

- Master Data Maintenance & Change Monitoring
- Configurations of recipe structure for Production Planning

Inventory Assessment

- Inventory Optimization
- Avoid Destruction and Monitoring

Material Planning

- Material Requirement Planning
- Order Management
- Procure to Pay process enabling

Value-Driven Transformation To Plan Ahead

Global Value Web's focus is data. We aim to gather, organize, curate, and analyze data in a way that suits your needs. We use data and value-driven strategies to enable you to make faster decisions and adapt to dynamic business needs.

We Pave The Way To Integrated Business Planning

At Global Value Web, we employ visibility to make data accessible. We convert raw data into insights, which will lead to better decision-making. Our planning digitization services make end-to-end integrated business planning possible.

Work with GVW Experts!

Global Value web has curious data experts that work with data in life sciences every day. They connect the dots across the value chain and share their insights with you and your people.

Especially in planning, it is essential that processes, systems, locations, and functions work together. Our professionals help you bridge the gap between business and technology in your enterprise.
