

# Future-proof laboratory information management systems

Clinisys Laboratory Solutions™ are discipline-specific laboratory information management systems built upon the Clinisys Platform™, a shared services architecture and data model for SaaS laboratory informatics.

Clinisys Laboratory Solutions help you stay competitive, accelerate productivity and quality, and future-proof your lab.

---

## **Fully configurable, digital workflows that work your way**

- Configure custom workflows with an unlimited degree of sophistication using a visual rules engine for dependencies, alerts, scheduling, and more
- Quickly add new capabilities using widgets, labels, logbooks, and tables directly in the UI
- Customize the external web portal for client self-service account management

---

## **Unlimited connectivity to protect your investment**

- Create bi-directional instrument integrations using data streams or flat-file parsing
- Integrate with any third-party database or registry, or with other back-office software, using XML, HL7, or web services
- Leverage extensibility to third-party ELNs or AI-driven diagnostic applications
- Use or share the fully-documented orders and results API

---

## **Data-centric structures for real-time data reporting and analytics**

- Empower end users with ad hoc queries, personalized dashboards, standard report templates, and an advanced report writer for custom reporting
- Access data and track business metrics for anytime, ad hoc reporting or auditing
- Automate report delivery via email, web portal, fax, HL7, or FTP

---

## **Quality-first design**

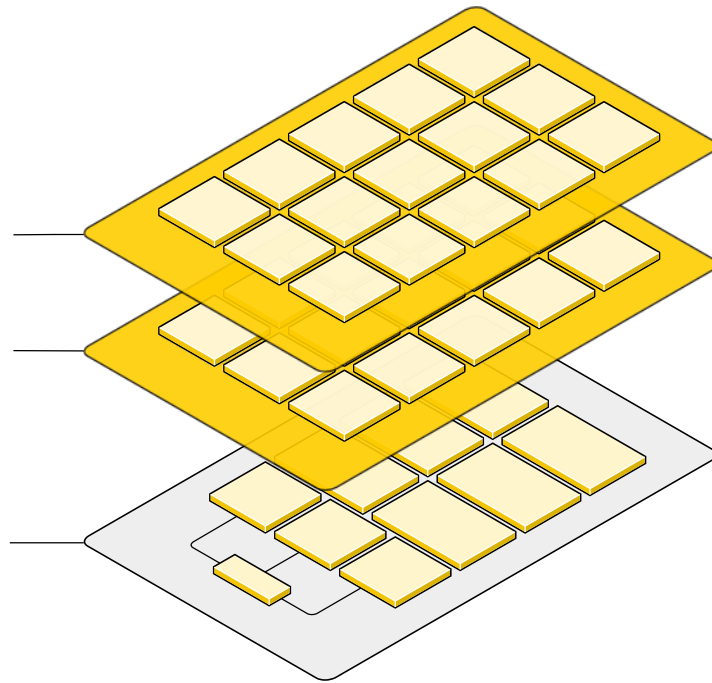

- Align workflows and process checks to support the quality management system and regulatory compliance
- Manage every aspect of laboratory operations, including personnel, reagents, supplies, competency training, validations, proficiency testing, and more
- Protect the integrity of your samples and data with complete chains of custody

## Clinisys Laboratory Solutions

Clinisys Laboratory Solutions are a suite of discipline-specific, laboratory information management capabilities for labs with various specializations. Enable the one or many functionalities you need from among our feature sets for the testing services your laboratory offers, now and far into the future.

### For Healthcare

- Clinisys Clinical Laboratory™
- Clinisys Cellular Pathology Laboratory™
- Clinisys Blood Bank Management™
- Clinisys Digital Pathology Management™
- Clinisys Microbiology Laboratory™
- Clinisys Genomic Laboratory™
- Clinisys Toxicology Laboratory™
- Clinisys Order & Results Management™

### For Contract Services

- Clinisys Contract Services Laboratory™

### For Crop Sciences

- Clinisys Crop Sciences Laboratory™

### For Environment & Water

- Clinisys Environmental Laboratory™
- Clinisys Water Quality Laboratory™

### For Food & Beverage

- Clinisys Food & Beverage Laboratory™

### For Pharma & Biotech

- Clinisys Pharma Laboratory™
- Clinisys Biotech Laboratory™

### For Public Health

- Clinisys Public Health Laboratory™
- Clinisys Environmental Laboratory™
- Clinisys Disease Surveillance™
- Clinisys Newborn Screening Management™

Experience the evolution of laboratory information management, designed to enable healthier and safer communities.

Explore the full suite of Clinisys Laboratory Solutions, all supported by the Clinisys Platform, to give you the flexibility and control you need, with the capabilities you expect from the global leader in laboratory diagnostic informatics.
